Abstract: We describe what is expected of a knowledge-based expert system, and the components from which such a system is constructed. We give a view of how an interplay between principles and practice has helped the knowledge system field to develop, and we give simple examples to show that reasoning techniques based on formal logic are now starting to provide a useful coupling between scientific and engineering work in the field. The examples are about logic programming, knowledge representation, judgmental reasoning, and about three methods by which a system can acquire the knowledge it needs. (Reprinted by permission of the publisher.)

Bright sparks: the advantages of EDM over other machining strategies are well known. Despite this, it's often been labelled a slow and laborious method of machining, especially in the early days of EDM. Product development has seen it evolve to suit production as well as toolroom applications. (EDM).

Information for good hygiene practice in small businesses

Holt, Georgina; Henson, Spencer J
British Food Journal v102n4 pp: 320
2000
ISSN: 0007-070X Journal Code: BFJ
Word Count: 6557

Abstract:

...implementation of good hygiene practices. The response of the food industry has been to develop audited standards of hygiene, higher than explicit legal requirements. Small businesses have, however, been slow to...

...of technical managers and owner-managers, with the latter often unaware of the existence of audited standards. It is argued, therefore, that, in order to increase the implementation of good hygiene...

Text:

...Since it is the agreed task of government and industry to maintain the level of risk from foodborne illness at the minimum which is technologically feasible, approaches to prevention must target...

...associated with poultry, pork, ham, processed meats and pies (EW, 1998);
Campylobacter infection, the main risk of which is cross contamination from raw meat to high risk products (IFST, 1999); and more recently the pernicious E. coli 0157 which has been found...

...are of vital importance in ensuring their safety and they are therefore categorised as high risk (ACMSF, 1990). (Meat pies for fresh consumption are categorised as medium to high risk.) For these reasons, in 1995 the SGMSF[7] instituted the first national study of these

...

...1994):

- provides an appropriate definition of the sector to which it applies;
- provides guidance on compliance with all parts of the regulations relevant to the sector;

- has a justifiable technical basis;

- distinguishes clearly between guidance on compliance with legal food safety requirements and guidance related to good manufacturing practice or product quality...for retailing, catering and baking (Chadwick House, 1997a,b,c). These guides incorporate advice on compliance with legal requirements and advice on good practice for the Food Safety (General Food Hygiene...

...available to companies as measures of safe practice (Henson and Northen, 1998):

(1) Customer specifications, audited either by the customer (first party audit) or by an external agency (second party audit).

(2) Accreditation agency standards (third party audit) including EFSIS, National Britannia, Law Laboratories Ltd, Procheck Food Safety Ltd, and Total Legal Compliance.

(3) Trade association codes of best practice. For example, the British Meat Manufacturers Association Manufacturing Standard which is equivalent to the EFSIS protocol and is externally audited by MLC[10] inspectors. Prospective members are required to be audited to the standard; however, copies of the standard are available to non-members. In October...

...45004 (inspection standard) and allows companies to be registered by UKAS[11] as satisfactory to audit to the standard. In November 1998, the EFSIS Standard was revised to incorporate all requirements of the BRC Standard and EFSIS are in the process of obtaining UKAS approval for auditing the standard. In addition, Assured British Meat (ABM)[12] has developed Product Certification Standards for...

...delineation of "identification" and "interpretation" as the significant first steps in the food safety standard compliance process (Henson and Heaseman, 1998) this paper addresses the mechanism by which these steps can...

...approved under the Meat Products (Hygiene) Regulations 1994.

Objective records were obtained through a hygiene audit conducted to the EFSIS protocol[13] by a qualified auditor. Interpretive accounts, of the development of hygiene standards and awareness of the

audit findings, were obtained through in-depth interviews. A semi structured interview procedure was followed, deemed...were aware of the existence of industry standards, codes of best practice or third party auditing bodies. Only one had not discussed industry standards with customers, whereas only two owner-managers...
...a technical manager had no prior knowledge of codes of best practice or third party auditing. The smaller companies were often motivated to join the project in order to obtain independent...

...the exception of two companies, the employment of a technical manager corresponded to success at audit. No companies without a technical manager passed the hygiene audit. The employment of a technical manager, therefore, appeared to be the single most important influence...

...Three companies employed a permanent part-time consultant. Although not sufficient to ensure success at audit, the use of a permanent part-time consultant did provide a useful source of information...

...the level of basic food hygiene only. However, not all these companies were referred at audit for inadequacy of technical support. Inadequacy of technical expertise has been highlighted recently in small...
fact that it was the two companies with an inexperienced technical person which failed the audit.

Industry contacts were the main source of information for most owner-managers and were also...reading, talking to people."

Discussion and conclusions

The case study of small businesses manufacturing high risk food products suggests that, due to the increased complexity of both scientific/technical information and...Businesses which choose not to provide a due diligence defence, such as certification to an audited standard, must take the consequences. However, it is up to policy makers and enforcers to...

...to maintain high standards within their business, as demonstrated by their willingness to allow hygiene auditors into their premises and to contribute two days of their busy working days to contribute...
